Hi Matt:

I received a call from the President of the Sammamish NE Water District (we have two water districts) he appreciated the presentation last night. The water district has received inquiries from people on the misconception of injection and asked if I could secure any written statements, depictions, or other information we could share with him to reinforce the message our geologist stated last night. Believe they have a meeting on Monday. Thanks

Ramiro Valderrama
City Council Sammamish
